

Daniel John Gonzalez

Software Engineer, Project Manager, Digital Architect, Team Lead

Danny@CodexCreative.com - 773-837-8865 - [linkedin.com/in/danieljohnngonzalez](https://www.linkedin.com/in/danieljohnngonzalez)

Professional Summary

Highly accomplished and results-oriented Project Manager, Software Engineer and Digital Architect / Platform Integrations Lead with over 20+ years of experience in delivering complex digital solutions and leading cross functional teams. Proven expertise in managing short-term and long-term projects, focusing on preventing scope creep, accurate estimation, risk management, and successful delivery under strict constraints. Willing to get hands-on as necessary. Adept at leveraging Agile methodologies (Scrum, Kanban) to drive project success, foster team coordination, and ensure stakeholder satisfaction. Trained under some of the best in the games industry.

Work Experience

Mayo Clinic // Digital Experience Delivery Manager · Lead Developer (Jan'24 - Current)

- Led the rebrand of Executive Health's digital platform, managing scope, timelines, and resources to deliver a reusable component library that significantly improved brand consistency and accelerated content deployment.
- Directed a multi-disciplinary development team, overseeing project execution and fostering collaboration to deliver scalable, cutting-edge digital solutions on the Adobe Experience Manager platform.
- Managed integrations between Adobe Experience Manager (AEM) and various enterprise systems, ensuring seamless functionality and enhancing patient experience within defined project parameters.
- Defined technical roadmaps and governance standards, improving content velocity and quality through effective project planning and control, maintaining and elevating high quality SEO and accessibility goals.

Wyndham, Travel + Leisure Co. // Software Engineer 2 · AEM Developer (Mar'21 - Dec'23)

- Implemented a Headless Cloud Service solution across multiple uniquely branded websites, managing project phases from conception to deployment, ensuring adherence to scope and schedule.
- Integrated Adobe Assets, Expedia Platform API, and other 3rd-party solutions, coordinating efforts to deliver a seamless user experience within project timelines and goals.
- Improved API & server response times by 40% through strategic caching, benchmarking and performance tuning; demonstrating effective project optimization and problem-solving.
- Hardened CI/CD pipelines, reducing deployment risk and improving release cadence through structured governance, backup and rollback practices, to ensure project stability.

Reynolds Inc. + Ariel Manufacturing // Senior AEM Architect & Developer (Jan'20 - Mar'21)

- Built online-games that were time driven and connected to real world promotions for Reynolds Inc (Camel).
- Transformed archived mechanical engineering blueprints into an interactive digital experience, demonstrating innovation in project execution and user engagement for Ariel Manufacturing.
- Integrated AEM with Adobe Analytics and other REST APIs, utilizing Agile development practices.

Work Experience Continued

Great Wolf Lodge // Web Developer · Web Team Lead · Digital Product Owner (Jul'19 - Jan'20)

- Led the digital migration from Drupal 6 to AEM in the cloud, architecting component-based solutions for the marketing department and managing the project lifecycle, including scope, resources, and timelines.
- Conducted code reviews, managed staff, and led Agile ceremonies for global engineering teams, ensuring efficient project execution and team performance.
- Defined content structures and managed content development to support rapid updates for marketing campaigns, demonstrating strong organizational and planning skills.

Grainger, Inc. // Software Engineer II · Front-End Engineering Team (Mar'17 - Jul'19)

- Contributed to enterprise-level programs across homepage and checkout, working within project frameworks to deliver high-quality solutions.
- Led migration toward a micro-frontend architecture, improving scalability and reducing page build time for content authors, showcasing project leadership in technical initiatives.

CDW Inc. // Senior Front-End Web Developer · AEM Integration Manager (Aug'15 - Mar'17)

- Managed AEM integrations into ASP.NET environments, implementing a headless CaaS model and overseeing project delivery.
- Drove continuous improvement based on data-driven insights, analytics, and marketing campaigns, aligning project outcomes with business objectives.
